PROFESSIONAL SUMMARY

Data professional with an MCA from Tezpur University (Central University, CGPA: 7.99), currently gaining hands-on experience as a Data Science Intern at NIELIT, Govt. of India. Built and deployed a machine learning regression model on 19,000+ real-estate records that cut agent-led overpricing by 15%, and an NLP/LLM-powered chatbot used daily by students. Skilled across the analytics stack — SQL, Excel, Power BI, Tableau, and Python — with a track record of turning raw data into clear, decision-ready insights for stakeholders. Open to full-time Data Analyst, Business Analyst, and Data Science roles.

TECHNICAL SKILLS

- Data Analytics & BI:** Advanced SQL (Joins, Window Functions, Subqueries), Excel (Pivot Tables, VLOOKUP, Macros, Power Query), Power BI, Tableau, Data Modeling, Dashboard Design, KPI Tracking, Exploratory Data Analysis, Data Storytelling
- Programming & Machine Learning:** Python (Pandas, NumPy, Scikit-learn), XGBoost, Random Forest, Regression, Classification, NLP, Large Language Models (LLMs), TensorFlow, PyTorch
- Business & Soft Skills:** Stakeholder Communication, Requirements Gathering, BRD/FRD Documentation, Cross-Functional Collaboration, Agile/Scrum, Data-Driven Decision Making

EXPERIENCE

Data Science Intern — NIELIT Janakpuri, Delhi Centre (Govt. of India)

Feb 2026 – Present

Smart-Bridge: AI Chatbot & Analytics Dashboard | [GitHub](#)

- Built an AI-powered chatbot using NLP and Large Language Models for multilingual translation and mock-interview practice, used daily by students.
- Developed a real-time analytics dashboard with Python and SQL to track user engagement and performance metrics, improving retention by 20%.
- Worked as Faculty for data analytics batches, teaching Advanced Excel, Power BI, and core data analytics concepts to student cohorts.
- Streamlined end-to-end data workflows and delivered weekly stakeholder insights using data storytelling techniques.

PROJECTS

Gurgaon House Price Prediction — [GitHub](#)

Python, Pandas, Scikit-learn, XGBoost, EDA, Data Storytelling

- Analyzed 19,000+ Gurgaon property listings to uncover agent-driven overpricing patterns of 10–20%, undermining price transparency for home buyers.
- Engineered features, tuned XGBoost and Random Forest models, and deployed via a web interface — reducing overpricing by 15% and saving buyers up to ₹10 Lakhs per transaction across 500+ valuations.

Weather Intelligence & Climate Analytics Platform (WICAP) — Personal Project

Ongoing

Python, SQL, ETL, Data Warehousing, Data Quality Framework, Dashboards

- Designing and building an enterprise-grade, end-to-end weather and climate analytics platform covering data ingestion, ETL, warehousing, and interactive dashboards, following professional engineering practices (formal documentation, version control, phased delivery).
- Architecting a data pipeline with a data quality framework (completeness, accuracy, consistency, timeliness) and building trend, seasonal, and anomaly-detection dashboards filterable by geography, date, and metric.

EDUCATION

MCA — Tezpur University (Central University, NAAC A+ Grade)

2024 – 2026 | CGPA: 7.99/10

BCA — SMS Varanasi (MGKVP)

2021 – 2024 | CGPA: 7.98/10

Class XII, CBSE — MJRP Academy, UP

2021

CERTIFICATIONS & ADDITIONAL

- NPTEL Certifications:** Data Analytics with Python — IIT Roorkee (73%) | Joy of Computing using Python — IIT Madras (71%) | Understanding Incubation & Entrepreneurship — IIT Bombay (90%)
- Other Certifications:** Data Science 101 — HP LIFE | The Ultimate Job Ready Data Science Course — CodeWithHarry
- Availability:** Immediate | **Languages:** English, Hindi
- Core Strengths:** Data Storytelling, Dashboard Design, KPI Tracking, Stakeholder Communication, Business Insight Generation
